

C l a i m s

1.     Bottle with special top for use in the medical field  
featuring  
5       a top (1) with a coupling (2) for the fitting of a  
transfer system to a feeding tube (3) and with a  
freshness seal (4).
  
2.     Bottle with special top as under Claim 1  
10       featuring  
the incorporation of a pressure-relief opening (5)  
into the top.
  
3.     Bottle with special top as under at least one of the  
15       claims above,  
featuring  
a coupling (2) for the fitting of a transfer system  
to the feeding tube (3) with an external thread (6)  
and  
20       at the free end (8) of the feeding tube (3), a cap  
(7) with an internal thread (9) for screwing into  
the external thread (6).

4. Bottle with special top as under at least one of the claims above,

featuring

- 5 a top (1) that is screwed with an internal thread (10) to an external thread located at the neck of the bottle,

and

a top (1) that has on its lower edge a lock-in ring (14) so that it is not detachable.

10

5. Bottle with special top as under at least one of the claims above,

featuring

- 15 a top (1) with perforation lines that tear apart when the top (1) is unscrewed.

6. Bottle with special top as under at least one of the claims above,

featuring

- 20 perforation lines placed vertically so that the top is damaged when it is unscrewed.

7. Bottle with special top as under at least one of the  
claims above,  
  
featuring  
  
a semi-permeable membrane (12) that is fitted into  
5 the pressure-relief opening (5).
8. Bottle with special top as under at least one of the  
claims above,  
  
featuring  
  
10 a felt membrane that is fitted into the pressure-  
relief opening (5).
9. Bottle with special top as under at least one of the  
claims above,  
  
15 featuring  
  
a closing cap (7) fitted on the top (1) to cover the  
coupling (2) and also covering the pressure-relief  
opening (5).

List of reference numbers

5		
	Top	(1)
	Coupling	(2)
	Feeding tube	(3)
	Freshness seal	(4)
10	Pressure-relief opening	(5)
	External thread in coupling	(6)
	Cap	(7)
	Free end	(8)
	Internal thread in cap	(9)
15	Internal thread in top	(10)
	Tubular cannula	(11)
	Semi-permeable membrane	(12)
	Lock-in ring	(14)
